

COMMERCIAL AND MONEY MATTERS.

For rates of Sums, &c. see Fourth Page.

TUESDAY, P. M.
The Stock Market was heavy to-day, and the transactions were only to moderate extent. The fan-
tasy is generally held, but Morris improved to 131. Shares
of New Treasury Notes were made at 101 1/2, which is
the highest. The old ones sold at 4 premium. The sup-
ply of notes on the market is rather large and the quo-
tations are not firm.

The rates for good Sterling bill are 4 1/2, the lat-
est of the first class. Some bills can be picked up at 3 1/2
but they are such as are not well known. Francis
is at 4 1/2. Sterling has not been so low as at
since 1831. In that year it went to 2 per cent.
In 1843 bills went to 2 per cent. and large in-
crease of specie took place. The following table shows
the rates of Sterling in January, April, July and Decem-
ber in the last 30 years.

Freight rates seem less active than they have been, but there is some yielding on the part of ship-owners—
Four can be had shipped to Liverpool in first class ships at 7%. Gram nominally 20 1/2d. To Ireland, three or four vessels accepted 21 1/2d. A ship was taken for her voyage to Liverpool at 5%. The Gon-
dola is at 8% and 9d. To Havre the rate is 2% for Cotton, 2% for Flour and 3% for Gram. To Liverpool Cotton is 1d. The Relief Committee have some news.

The Sub-Treasurer paid last week One Thousand Dollars for the transportation of a Million in specie to Philadelphia. Before these Sub-Treasury days the money would have been made in drafts without any expense.

The Hendrik Hudson, arrived to-day, has about one hundred thousand dollars in specie. Parties best informed believe that there are six or seven millions of specie on the sea bound for this country. The arrival of this will speedily relieve the money market of the tightness which now exists.

It will be seen by the following statement of the receipts of the Stonington Railroad for the last six months, that the increase has been over 45 per cent. as compared with the corresponding months of the previous year. There has been no increase in expenses.

Receipts for six months, ending March 1, 1847, \$90,361 79
in corresponding months last year \$79,778
Increase \$10,583

The Bank of Louisiana has declared a semi-annual dividend of four per cent. The Atlantic Bank (No. 1) a semi-annual dividend of three and a half per cent. payable on the 15th inst.

Certificates from \$1 to \$10 on the new emission of Albany Exchange Bank are in circulation. The bank has no 10% of the emission.

Thompson's Bank Note Reporter gives the following statement:

Specie due notes on the Merchants' Bank of Boston are in circulation. The bad notes have a small number in the President's and Cashier's names. The genuine have the words "secured by the pledge of stock of the State of New York" in a circle.

Currency is scarce, and the brokers are anxious to buy in our State at 1 to 1. The circulation of most of the country Banks is up to the legal limit, and some of them are very low in the market purchased promissory bank notes for their counter customers; this is quite uncommon for the Spring season.

Tons of the Commercial Bank, at Gratiot, Michigan, also to Framingham Bank. "Mass." made its debut appearance, signed O. Dean, President; Rufus Brewster, Cashier. The genuine bills of the Framingham Bank are from the present stereotype steel plate.

The Committee of the Senate of Maryland, to vindicate the Resumption bill, which has passed the House, yesterday, have reported it back with a recommendation that it pass. It will probably become law at once.

All Boston no new features have been presented to the Money Market. Business generally has been very full. Stock continue in moderate demand for investment, and the sound securities are steadily advancing in price.

The Railway Share Market closed on Saturday at the following quotations:

Stocks of new stocks in the Western Road, the stock is now worth 1 per cent. premium, in view of at least 34 and possibly 4 per cent. dividend to July next. It is understood that no further issues of shares are to be made this year, and that time, and then only enough to pay for about twenty miles of double track.

The principal in the miscellaneous stocks recently have been in the shares of the East Boston Land Company, which are now worth \$21, including the land dividend, which is an advance of about 30 per cent. on the current price within a year. A large tract of land has been purchased of the Company, on which is to be erected an extensive iron foundry.

Schuldt's Reporter says:

The Philadelphia Money Market is rather more confined. The Banks are furnished with the same number of paper as before, but out of doors.

Interest rates are 7 to 9 percent. We hear of large amounts of U. S. Treasury Notes. The Money Market has suffered from the withdrawal of so large an amount of funds from the market for the purpose of being turned to the purchase of Treasury Notes.

The following is the amount of the principal articles shipped from the Lancaster Railroad office east, in the month of February. Flour, 34,570 bushels; Corn, 107,700 bushels; Wheat, 4,000 bushels; Seed, 2,335 bushels. No. of cars 5,487.

Increase \$1,980

Specie imports \$1,338,881

A large and respectable meeting of delegates from the four counties of Monroe, Livingston, Ontario and Wayne, was held at West Bloomfield on the 4th instant, to take into consideration the subject of constructing a Rail-road from Rochester to Corning, in Steuben county, to intersect at that point the New-York and Erie Railroad.

The distance from Rochester to New-York via the proposed road is 62 miles less than by way of Albany. The length of the road from Rochester to Corning will be in the neighborhood of 50 miles—more than half of the distance is through the valleys of the Genesee and other streams, which water a country

sweeping southwardly.
